Unleash your driving driving adventure

GREMAX MAX STR

is a semi-steel special trailer tire. It is dedicated to be designed with low rolling resistance and fuel economy. GREMAX MAX STR Radial Trailer tire can meet every requirement of your trailer demand. The full range of tires are manufactured with two full nylon cap(except 13”) and reinforced polyester. ST235/85R16 is especially designed with three ply polyester for highest loading capacity. All skus are traditional design with full tread depth and wider footprint, enables the tire's high speed performance and long mileage.

Features & Benefits

- Full tread depth and inner high tensile steel belts guarantee maximum treadwear.
- Special tread compound offers greater power, durability, wet grip handling.
- Engineered excellently for trailer applications.
- Reinforced structure ensures high loading capacity and safety.

Full lines with 2-ply nylon cap

2-PLY Polyester Construction (ST235/85R16 with 3-PLY Polyester)

made in Thailand
